## PROFILE

Software Developer with experience in building full-stack applications and data-driven systems. Skilled in developing scalable web platforms, mobile applications, and backend services, with additional expertise in machine learning integration. Passionate about building real-world systems that are reliable, efficient, and impactful.

## EDUCATION

|                                                                                                    |                |
|----------------------------------------------------------------------------------------------------|----------------|
| <b>Chanakya University, Bangalore, Karnataka</b><br>Master's in computer applications - CGPA: 9.77 | 2024 - Present |
| <b>Don Bosco College, Panjim, Goa</b><br>Bachelor's in computer applications - FGPA: 9.30          | 2022 – 2024    |

## INTERNSHIP

|                                                                                                                                                                                                                                                                                                                                               |                   |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| <b>Software Developer Intern, Asia to Genki Co. Ltd</b><br><i>Matsuyama, Japan</i> <ul style="list-style-type: none"><li>Developed GPS-based community application (Serendipity)</li><li>Integrated MapLibre &amp; LocationIQ APIs for real-time mapping using React Native</li><li>Applied user-focused design and problem-solving</li></ul> | 11/2025 – 03/2026 |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|

## SKILLS

|                                                |                                                       |
|------------------------------------------------|-------------------------------------------------------|
| <b>Programming :</b> Java, C, Python           | <b>Web &amp; App Development :</b> React.js, Node.js, |
| <b>Data Visualization:</b> Power BI            | Flutter, HTML, CSS                                    |
| <b>Databases :</b> PostgreSQL, MySQL, MongoDB, | <b>Tools:</b> Git, GitHub, Streamlit                  |
| Supabase, Firebase                             | <b>Other Concepts:</b> ML&DL and REST API             |

## TECHNICAL PROJECTS

|                                                                                                                                                                                                                                                                                                                                      |                |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| <b>KneeCare –Healthcare Gait Cycle Analysis for Knee Osteoarthritis (Ongoing),</b><br><i>Under Prof. Vidyapati, IIT Kharagpur</i> <ul style="list-style-type: none"><li>Built ML + computer vision system for gait analysis and knee monitoring</li><li>Designed real-time insights for rehabilitation and early detection</li></ul> | 2025 – Present |
| <b>EduSign –A Indian Sign Language</b> <ul style="list-style-type: none"><li>Developed AI-based system for Indian Sign Language gesture recognition</li><li>Designed real-time insights for rehabilitation and early detection</li></ul>                                                                                             | 2025           |
| <b>Fitliya – Fitness E-Commerce Platform</b> <ul style="list-style-type: none"><li>Developed full-stack web app with authentication and product management</li><li>Built backend using PHP and MySQL with secure data handling</li></ul>                                                                                             | 2023           |

## CERTIFICATES

|                                                                                   |                                                                      |                                                                   |
